Career Objective

Aspiring Software Engineer with hands-on experience in software development, backend systems, and AI-driven applications. Seeking to apply programming and problem-solving skills to develop reliable solutions and contribute effectively to a collaborative engineering environment.

Education

Nitte Mahalinga Adyantaya Memorial Institute of Technology, Nitte **2023 – 2027**
B.E. in Information Science and Engineering CGPA: 9.61 / 10.0

Experiences

Hewlett Packard Enterprise – CPP 2026 **Feb 2026 – Jul 2026**
Project – Transforming Organizational Documentation using Doc AI Agent *Remote*

- Built a webhook-driven pipeline to automatically ingest, enrich, and normalize documents from GitHub, Confluence, and Jira.
- Designed an AI classification workflow using clustering and vector-based pre-filtering, improving classification accuracy by 15.8 percentage points across 20+ configurations.
- Deployed a 3-layer Dockerized RAG service on Azure using PostgreSQL, pgvector, and Cross-Encoder reranking for source-cited document retrieval.

Sasken Technologies Limited **Jun 2025 – Jul 2025**
Intern – 4th Generation Wireless Radio Access Network (LTE RAN) *Remote*

- Gained hands-on exposure to telecom network architecture, protocol layers, and key wireless performance concepts through an industry-oriented technical curriculum.
- Studied 4G LTE RAN architecture, UE–eNodeB–core communication, RRC, SRB/DRB, protocol layers, network routing and wireless performance concepts.

Projects

Gesture-Based Air Canvas **Apr 2026**
Technologies: Python, OpenCV, MediaPipe

- Developed a real-time computer vision application processing a 1-camera webcam stream with MediaPipe hand-landmark tracking for precise gesture-based interaction.
- Implemented gesture-driven interactions including virtual drawing, color selection and targeted erasing, optimized for smooth real-time rendering.

Smart Parking System **Apr 2025**
Technologies: HTML, CSS, JavaScript, MySQL

- Developed an end-to-end web application with an interactive frontend, backend services and MySQL for user registration, real-time parking availability, reservations and payments.
- Implemented relational database workflows using transactions, triggers, stored procedures and prepared statements to maintain reservation consistency and reduce SQL-injection risks.

Technical and Soft Skills

Languages	: Java, Python
Web & Backend	: HTML, CSS, Node.js, FastAPI, REST APIs, Webhooks, RabbitMQ
AI & Agents	: LangGraph, RAG, Vector Search, Cross-Encoder Reranking
Databases	: PostgreSQL, MySQL, MongoDB
Developer Tools	: Docker, Git, GitHub, VS Code, Jupyter Notebook
Soft Skills	: Problem Solving, Self-learning, Adaptability

Certifications

- **The Complete Python Bootcamp** – Udemy
